School Measures in times of Weather Alert and Warning being Issued

津市立久居中学校

	〈1〉 When a storm/snowstorm/heavy snow alert or heavy rain/flood alert due to a typhoon is issued When a special weather warning (such as heavy rain/ storm/ storm surge/ wave/ snowstorm/ heavy snow) is issued	〈2〉 When warnings such as heavy rain, flood, waves, storm surges, etc. or warnings such as heavy rain, flood, or strong winds are issued.
Before class	① If a targeted alert is issued as of 6:00 AM, school lunches will be discontinued. If the alert does not get lifted at 7:00 AM, we will close the school. ② If the alarm is lifted by 7 AM, please have at least extra two hours to spare to go to school after the alarm is being lifted. * Please refrain from going to school if the route to school zone is dangerous or is expected to be dangerous even if the alarm is lifted.	The classes will be conducted as usual. * If it is difficult to secure the safety of going to and from school, please postpone it.
On the way to and from school	① We will have the students who are inside the school in a safer place, and the school will have the same response as when they are at school. ② School faculties will patrol school districts to ensure children's safety by sending students home or to school, and guiding them to a safe place (the morning patrol will start after the faculties arrive at school.)	The classes will be conducted as usual.
When at school	(The school will do the same response if there are students who came to school early, or there are some students in school for after-school activity or club activities on holidays.) ① As a general rule, all the classes will be terminated and the school will start to take measures to send students home. ② We will have students in a safe place and gather information about the weather such as wind, rain, and other conditions and also the safety on school zones before sending them home. ③ If it is difficult for children to return home safely, the school will continue to protect them at school while contacting their parents. ④ When we send students home from school, we will make a decision based on the situation by contacting their parents and referring to the following. (㉠) a regular dismissal from school (㉡) going home in groups with the faculties. (㉢) Students being picked up parents, handed over to parents on the way to/from school, or sent home with cooperation from the community. (㉣) Have the student protected at school until the parents' arrival	The classes will be conducted as usual.

 【on the way to and from school】
 【when at school】
If a hazard is foreseen by the circumstances of each school or community, the teachers will take appropriate action while communicating with the parents at the principal's discretion.

※Interpretation of heavy rain alert or flood alert associated with approaching typhoons

(1) If a heavy rain alert or flood alert is issued after a typhoon changes to a low pressure, it does not fall under the category of “Heavy rain Alert or Flood Alert due to Approaching Typhoon”.

(2) If it falls under the category of a “Heavy Rain Alert or Flood Alert due to Approaching Typhoon”, even if the typhoon's power has weakened and it is no longer a typhoon, or even if the typhoon is moving away, we will continue to take measures such as closing the school temporarily until the alert is lifted.

※ The school will contact you via emergency contact method such as Machi-comi mail or the class phone tree but depending on the situation, we will use the disaster message dial (171).
